Notes

A number in parentheses following the name of a locality indicates the number of breeding-site symbols shown on the map at that locality.

A bracket which groups two or more geographic names indicates that the localities are represented by a single breeding symbol.

A question mark following a geographic name means confirmation of breeding is needed for that site.

NOTES

(1) Numbers by symbols refer to bibliography.
(2) Maps compiled by J. Phillip Angle, Peter C. Harper, Margaret A. Bridge, and Maria M. Boyd.
